

PRODUCT INFO:

CORE TUBE WITH REMOVABLE SLEEVE

Item code CORE4830C, The Core Tube is for taking undisturbed samples in firm but not hard soils. The stainless steel tube has a removable nose cone and either a clear acrylic or stainless steel sample retention sleeve. The sampler is driven into the soil using a Slide Hammer. The nose cone is unscrewed using the C-spanner supplied and the sleeves slide easily in or out of the sampler. End caps to seal the sample inside the sleeve for transportation are available. The sample is 48mm x 300mm long.

Options: Plastic end caps; Stainless Steel or Clear plastic sleeve; Coarse Thread Only;

Also available as 40mm ID plastic sleeves CORE4330C
