PRODUCT INFO: - Ratchet type handle Item Code TH.AMS.R

We now stock the same ratchet type handle as AMS (USA auger manufacturer) use that we import direct from the manufacturer, Lowell Corp in the USA, under our own 'DORMER' brand. Lowell Corp make these for use on fire hydrants in USA. Our own proto-type ratchet handle proved too difficult for us to mass produce and to weatherproof the mechanism.

Our standard non-ratchet handles are still available.

- **We can modify your AMS handle to suit our thread (item code ADAPT(AMS)) or we can supply the whole handle already modified (item code TH.AMS.R).**

Our standard welded handles are still available.
