Prices are in Australian Dollars (AUD\$). The GST (Tax) is not applied for sales outside Australia.

THE FOLLOWING INFORMATION WILL HELP YOU UNDERSTAND OUR EQUIPMENT

TO PRINT THIS PRICE LIST SET ALL MARGINS TO 1cm, OTHERWISE WILL PART PRINT EACH PAGE.

Our prices are fixed for the calendar year. Our Terms & Conditions of Sale apply to all sales and take precedence.

Freight is by registered parcel post or normal road freight within Australia and is part of the price.

Road freight, the receiver must be in attendance at all times during business hours otherwise a redelivery fee applies

For small and urgent item/s upto 5kgs we use Express Post and is charged as extra.

We do not have any accounts with domestic airfreight, most orders are heavy and too costly by airfreight.

We can send goods on your freight account.

Any order requiring a pallet is charged extra, POA.

The 'C' thread is a coarse thread (1 & 1/8" acme 4TPI modified) and is now our standard.

The C thread has superceded our 'F' thread (Fine thread 5/8" whitworth) as we announced in 2001.

The F thread was still available from stock until 1st January 2010 and after that only made to order.

The 2006 price list was the first year to not list prices for the F thread.

All items are sold individually; e.g. Augers, Handles, Tommy Bars, Extension Rods, Push Tubes & End Caps.

The sizes of the equipment are nominal only and designate the OD of the materials they are made from.

Each auger design, cuts a different sized hole because of different cutter shapes and clearances.

For specific hole sizes talk to our sales people because we often customise augers to cut specific sizes.

We have 7 different designs for our sampling augers, some are general purpose and some are type specific.

Most sampling auger heads are 450mm long and welded to a shaft to bring them to 1.0m or 1.5m long.

Augers come with case hardened cutters as standard or can have upgraded hardening, speak to our sales person.

Most augers are painted steel as standard or can be made from stainless steel (add 30% to steel price).

The item code for stainless steel items has 'SS' before the thread type 'C' or a '/SS' after the 'C'.

Extension rods are threaded male one end and female the other and undo with the aid of Tommy Bars.

Extension rods are available in painted steel or aluminium or stainless steel and as 0.5m or 1.0m or 1.5m long.

For hammering samplers we recommend our heavy duty versions of the painted steel extension rods.

Casing sizes are the OD of the casing and the ID is 10mm less.

The OD of the casing is flush fitting when joined and the inside has thicker sections at the threads.

The casings threaded ends are welded into lightweight tube and the threads are machined after the welding.

We have canvas carry bags for augers and kits and have toolboxes for large quantities or for lockable security.

The Drillmite is our hydraulic power unit that replaces the manual T-handle and has variable power control.

We also make adaptors to connect other engine drive units to our equipment.
